

Protect Your Electronics and Expensive Appliances from Power Surges with

The power of electricity brings you hot water for a warm bath, lights to read by at night, the entertainment of television, and heat in the winter. To make life better for you and your family, appliances need a certain electric voltage to operate.

SMECO designs its electric system to supply the right voltage for your home; however, power lines, telephone lines, and television cables can also provide a path for power surges. Surges can be caused by storms, lightning, and

auto accidents, and they can damage computers, televisions, and other sensitive electronic equipment.

Home appliances like air conditioners, refrigerators, and washing machines can withstand some voltage surges, but even these heavier appliances can sustain damage.

StormSentry can help reduce your exposure to possible surges that could damage your appliances and interrupt your daily routine.

ENROLLMENT FORM

Enroll me in SMECO's StormSentry program and install a surge arrester on the electric meter at the service address below. I understand that SMECO will bill me \$5.25 per month plus tax on my electric bill. I understand that if I cancel StormSentry within the first year, I will be charged \$50 to cover the cost of installation and equipment.

You will receive a FREE plug-in surge protector of your choice. Select one of the following:

- unit with two electric receptacles and a telephone/modem connector.
- unit with two electric receptacles and a television cable/antenna connector.
(This unit will not safeguard satellite dishes. Call SMECO to order an appropriate model for this purpose.)
